

YOU DESERVE TO BE HACKED®

Successful companies are constant targets for attackers. Those who take security seriously don't test their defenses once a year.

They subscribe to CovertSwarm.

CovertSwarm®

TRADITIONAL SECURITY TESTING IS FAILING YOU.

While you plan your next penetration test, attackers are already mapping your surface, probing endpoints, and exploiting vulnerabilities. They don't follow scopes or timelines.

They target everything and strike when you're least prepared.

And they won't leave a nice PDF report behind.

STOP TESTING. START ATTACKING.

CovertSwarm delivers what others can't: relentless, human-led cyber attack simulations across digital, physical, and social vectors, delivered through a simple subscription.

We don't follow scripts. We adapt, escalate, and exploit like real adversaries, so you know exactly where you stand, before they do.

THIS IS WHAT OFFENSIVE SECURITY SHOULD BE.

From hardened defenses to sharper SOCs, CovertSwarm delivers board-ready improvements you can measure, not just static reports:

OUTPACE ATTACKERS

by uncovering unknowns before they're exploited, fixing weaknesses as they emerge, in real time.

VALIDATE YOUR INVESTMENTS

by proving what holds under pressure and exposing what fails, so you can prioritize with certainty.

IMPROVE ROI

by making your SOC and internal teams smarter, faster, and focused on the risks that truly matter.

CREST PEN TEST STAR Intelligence-led PT STAR-FS Intelligence-led PT CBEST

CONSTANT CYBER ATTACK SUBSCRIPTION.

Our Constant Cyber Attack Subscription delivers relentless, full-spectrum assaults across your digital, physical, and social surfaces.

Forget rigid scopes and waiting weeks for a report. We give you a relentless adversary, attacking, probing, and exposing weaknesses before real attackers do.

When we find a path to compromise, you can fix it before it becomes a real breach.

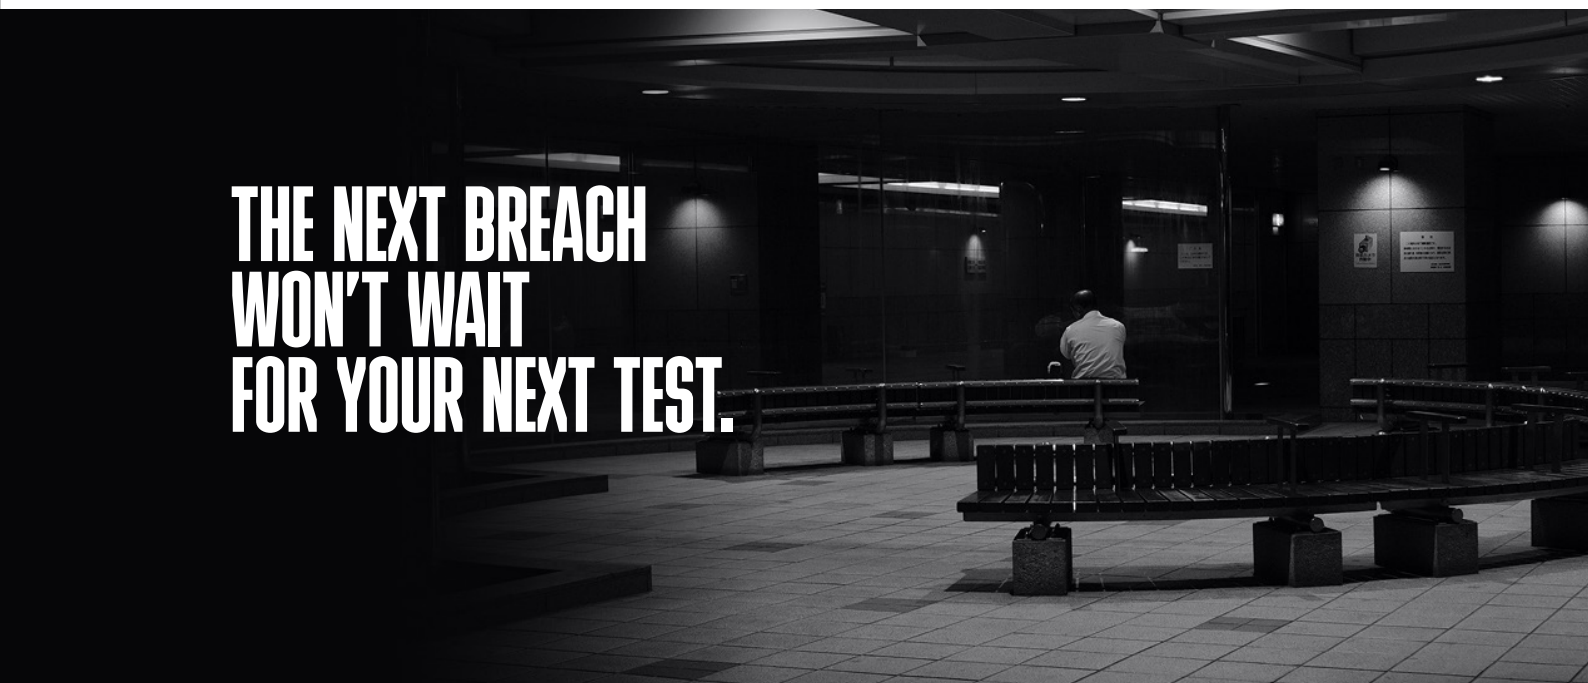

And if we can't, you'll know your security investments are working.

OUR CONSTANT CYBER ATTACK SUBSCRIPTION INCLUDES:

- **Monthly cycles. No hidden fees. No limited scopes**
- **Full-spectrum cyber attack across physical, digital and social vectors**
- **A direct line to our ethical hackers through Slack instant messaging**
- **Board-ready reporting and strategic attack plans**
- **Compliance-ready testing capabilities, including CBEST and STAR-FS**
- **Real-time access to attack plans and report on the CovertSwarm Portal**

For the cost of one internal hire, you access an elite team delivering STAR, STAR-FS, and CBEST at the highest standards for financial and regulated industries.

Are you ready? Let's find out.

ARE YOU READY? LET'S FIND OUT

CovertSwarm is a global leader in offensive security. We deliver full-spectrum attack simulations across digital, physical, and social vectors, helping organizations outpace evolving threats.

Our subscription-based model replaces point-in-time testing with real adversary emulation, ensuring your defenses are proven, not assumed.
